ABOUT ME

I am driven by deep passion for innovation and the endless possibilities of technology.

EDUCATION

AL-AMEEN ENGINEERING COLLEGE
3rd Year, B.TECH AI&DS

ACHIEVEMENTS

Best Student Award, for outstanding academic performance and overall excellence at college.

1st Prize - 23rd ISTE Hackathon

1st Prize - national level IIC Hackaton challenge, PSG college

1st Prize - Startup Mania, Vidya Vikas Engineering College

1st Prize - Internal Hackathon, Al Ameen Engineering College

1st Prize - State Level Project Expo, Surya Engineering College

1st Prize - Project Presentation, State Level Symposium, Sakthi Polytechnic College

Winner - Unstop Daily Quiz(Certificate of excellence)

2nd Prize - Project Presentation, National Level Technical Symposium, Nandha Engineering College

2nd Prize - Product expo, National Level Technical Symposium, Bannari Amman institute of technology

2nd Prize - Project arena, National Level Technical Symposium, Al Ameen Engineering College

Runner up - Unstop Daily Quiz(Certificate of excellence)

3rd Prize - Poster Presentation, ISTE(Indian Society for Technical Education)

3rd Prize - Paper Presentation, National Level Symposium, Kongu Engineering College

Special mention - Project presentation, National level Technical fest, Kongu Engineering College

Second runner up - Unstop Daily Quiz(Certificate of excellence)

CampusCrew 100K Milestone Honor

Got top performer 10/5000 on SIBM – SnapTitude competition

50+ international competition certificates

100+ national government competition certificates(Got Change Maker batch on mygov)

Certificate of Achievement - How to join ISRO, NASA and Other Space Companies(Workshop)

SKILLS

• Python	• Auto HotKey	• C++
• Machine learning	• Java	• QiSkIt(Python library)
• Deep learning	• Computer Vision	
• Embedded systems	• HTML/CSS	
• AIoT(AI Internet Of Things)	• Problem solving	
• Game development	• Critical Thinking	

Internships

Marketing Intern — Rinex.ai June 2026 – July 2026
Machine learning Intern — QSkill June 2026 – July 2026

In-Plant Trainning

Embedded System — Codebind Technologies 5 days
--

PROJECTS DESCRIPTION

ALFRED:

ALFRED is a futuristic AI assistant inspired by human-like intelligence, designed to observe digital environments, understand tasks, and execute intelligent automation through vision-based interaction and advanced logic.

MICROBOTS:

MICROBOTS is a distributed offline AI automation ecosystem where multiple intelligent agents collaborate in real time to perform advanced, human-like automation with scalability and independence.

Zentrix:

Developed Zentrix, an AI-powered remote automation ecosystem integrating screen vision, real-world computer vision, intelligent task generation, speech interaction, and remote device control to enable smart, scalable, and location-independent automation.

Watchful Protector:

An AI-powered real-time vision and security system that detects intruders, triggers sound and light alerts, captures evidence, and sends instant email notifications. Designed for intelligent surveillance with future applications in emergency systems and AI-assisted drone coordination.

KnightBot:

An intelligent multi-tool software system integrating 10+ powerful utilities into one platform, originally built at 15 and now redesigned with smarter and more advanced capabilities.

NFS (National File Security):

NFS rethinks file protection by combining password security with device identity verification, creating a smarter and more resilient approach to digital security beyond conventional authentication methods with Quantum computing for random password generation.

DUMEE:

DUMEE is a futuristic mobility prototype built to demonstrate AI-assisted remote driving through intelligent control systems, digital steering, and voice-based navigation—exploring the next generation of connected transportation.

Continuously building and experimenting with new projects, fueled by a deep passion for innovation and creating advanced technologies.
